

COWHEALTH

Cowhealth

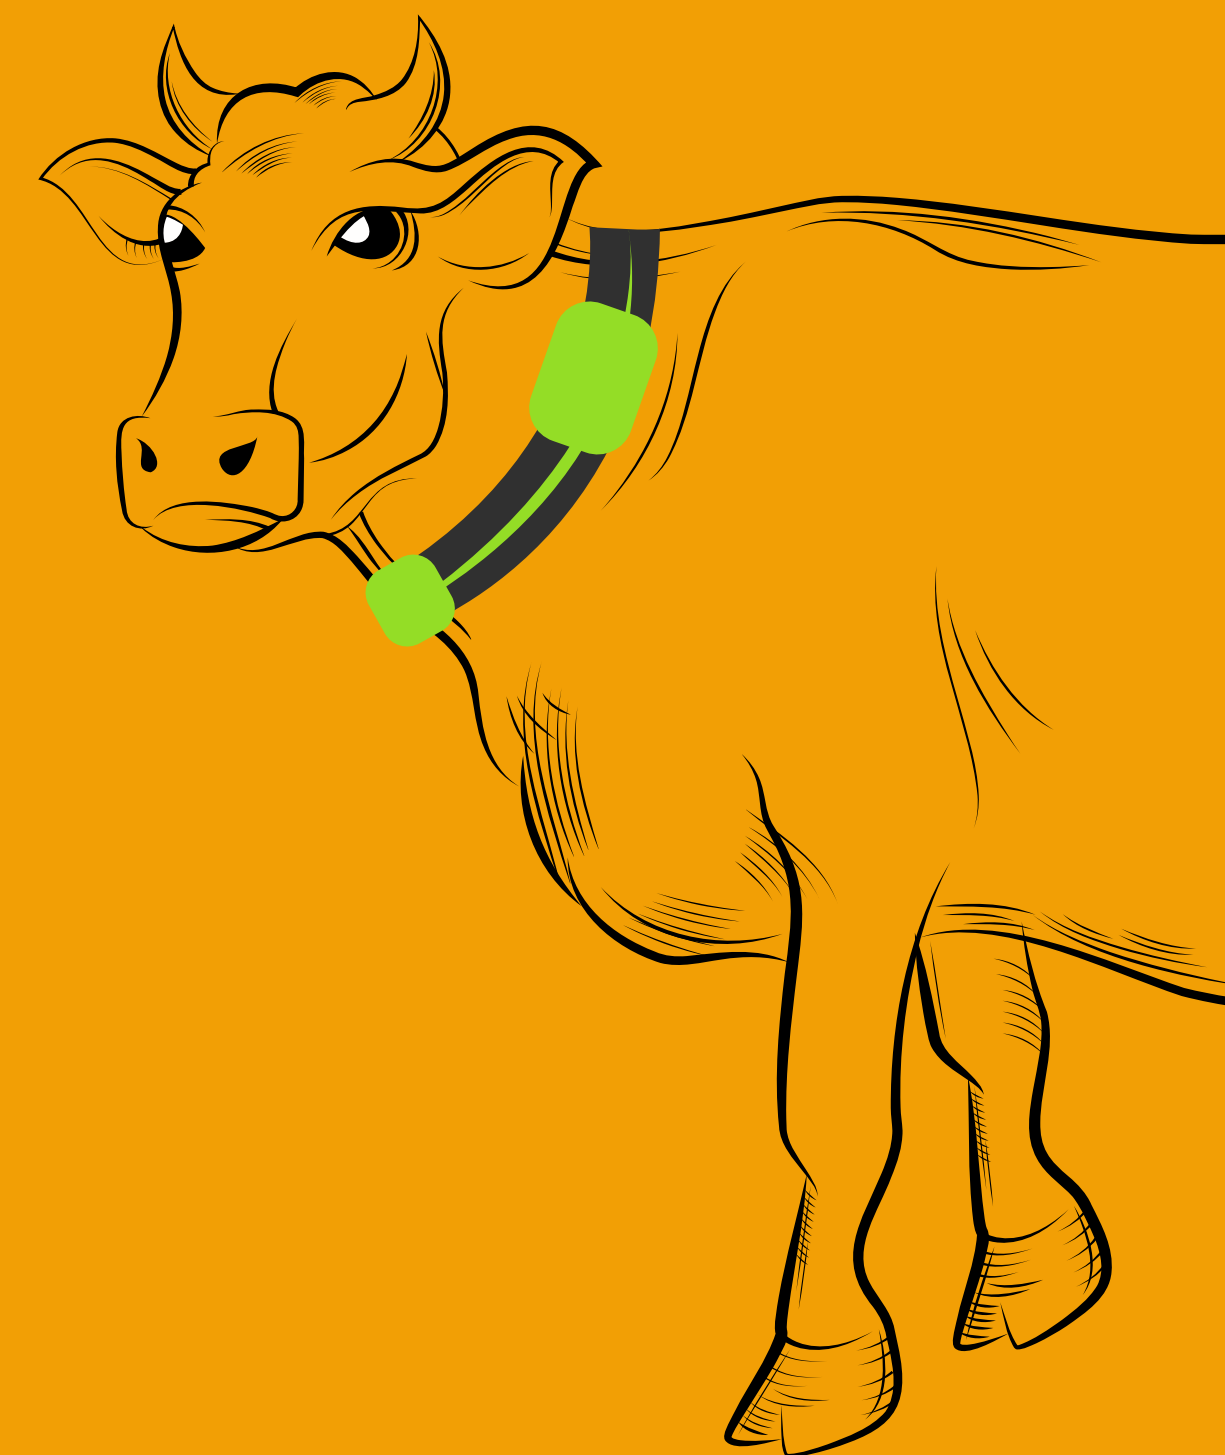

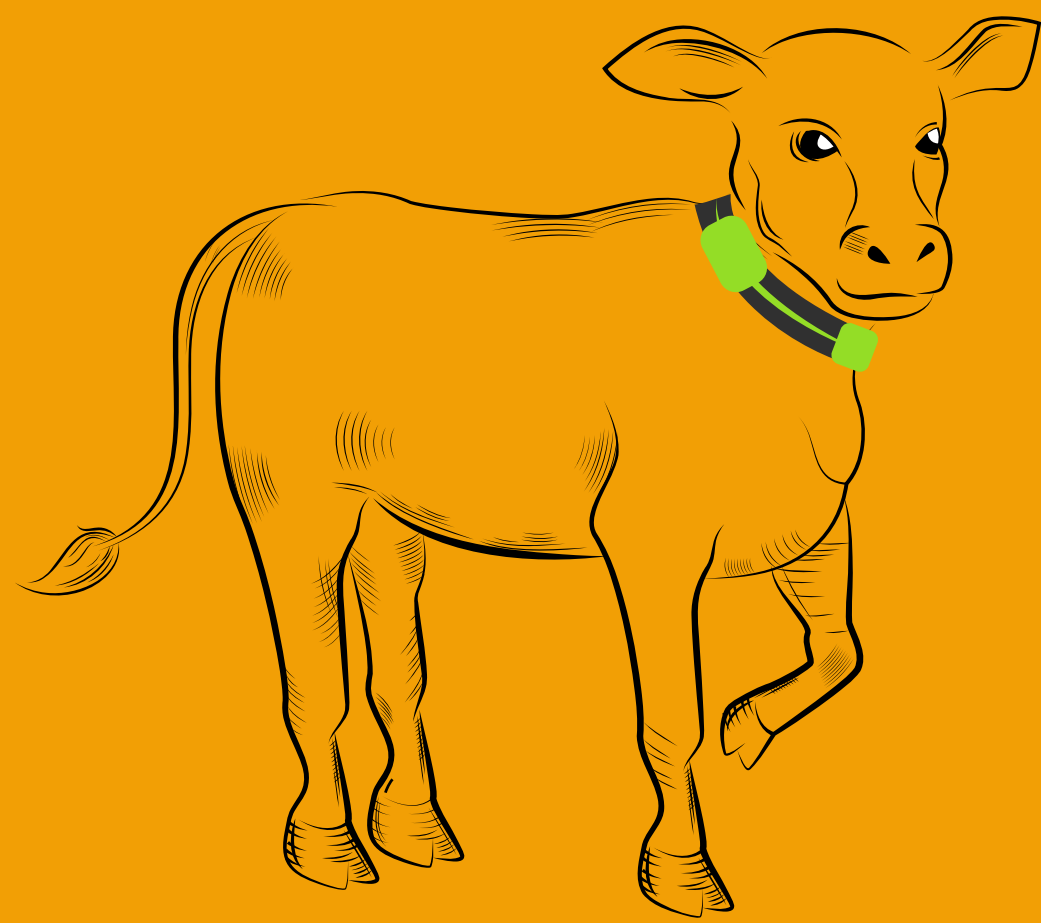

Your herd needs it. You deserve it.

What is Cowhealth ?

Cowhealth is a reliable and effective cow monitoring neck collar, featuring advanced yet easy-to-use technology designed to help dairy farmers improve herd health, fertility, and nutrition.

COWHEALTH

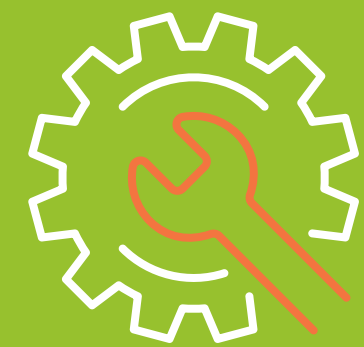

Why Cowhealth ?

1 million

cow sensors to manage your farm

Advanced health

monitoring technology accessible from anywhere in the world

Excellent, upfront service

Constantly innovating the next best feature
for improved herd management

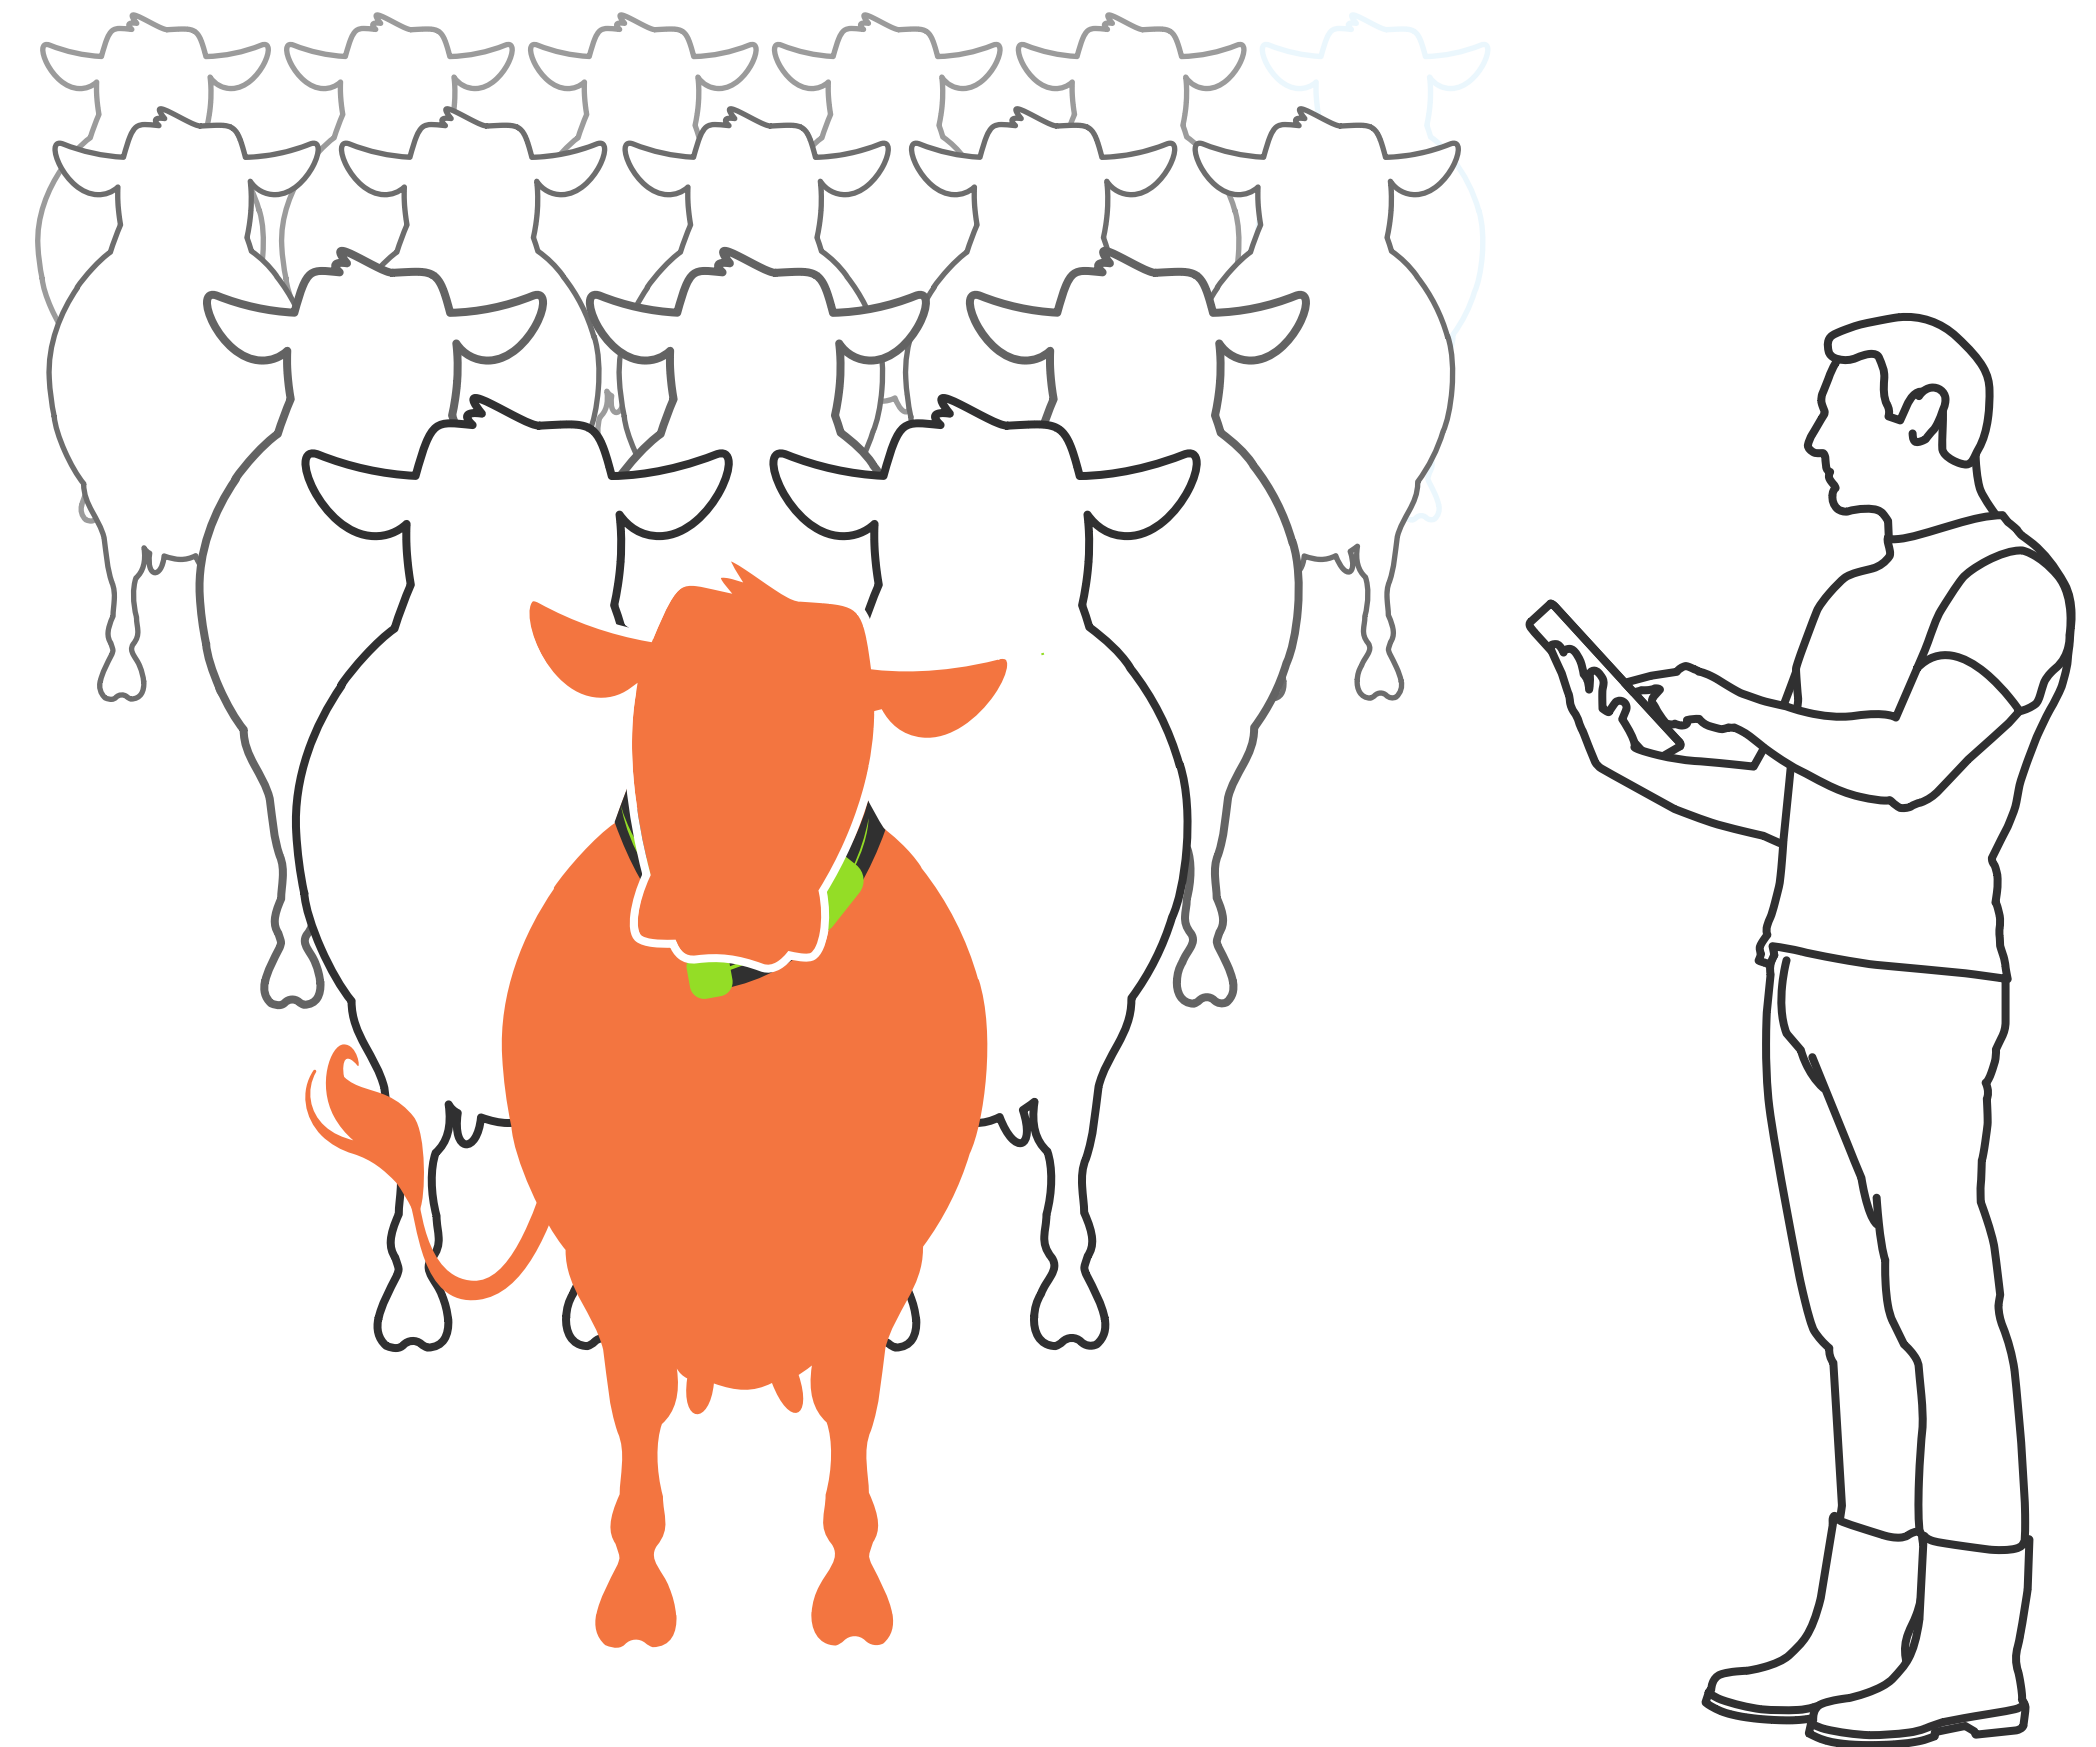

A professional team of
experts

COWHEALTH

Who **it's** for:

Dairy farmers seeking advanced heat detection and herd health monitoring technology.

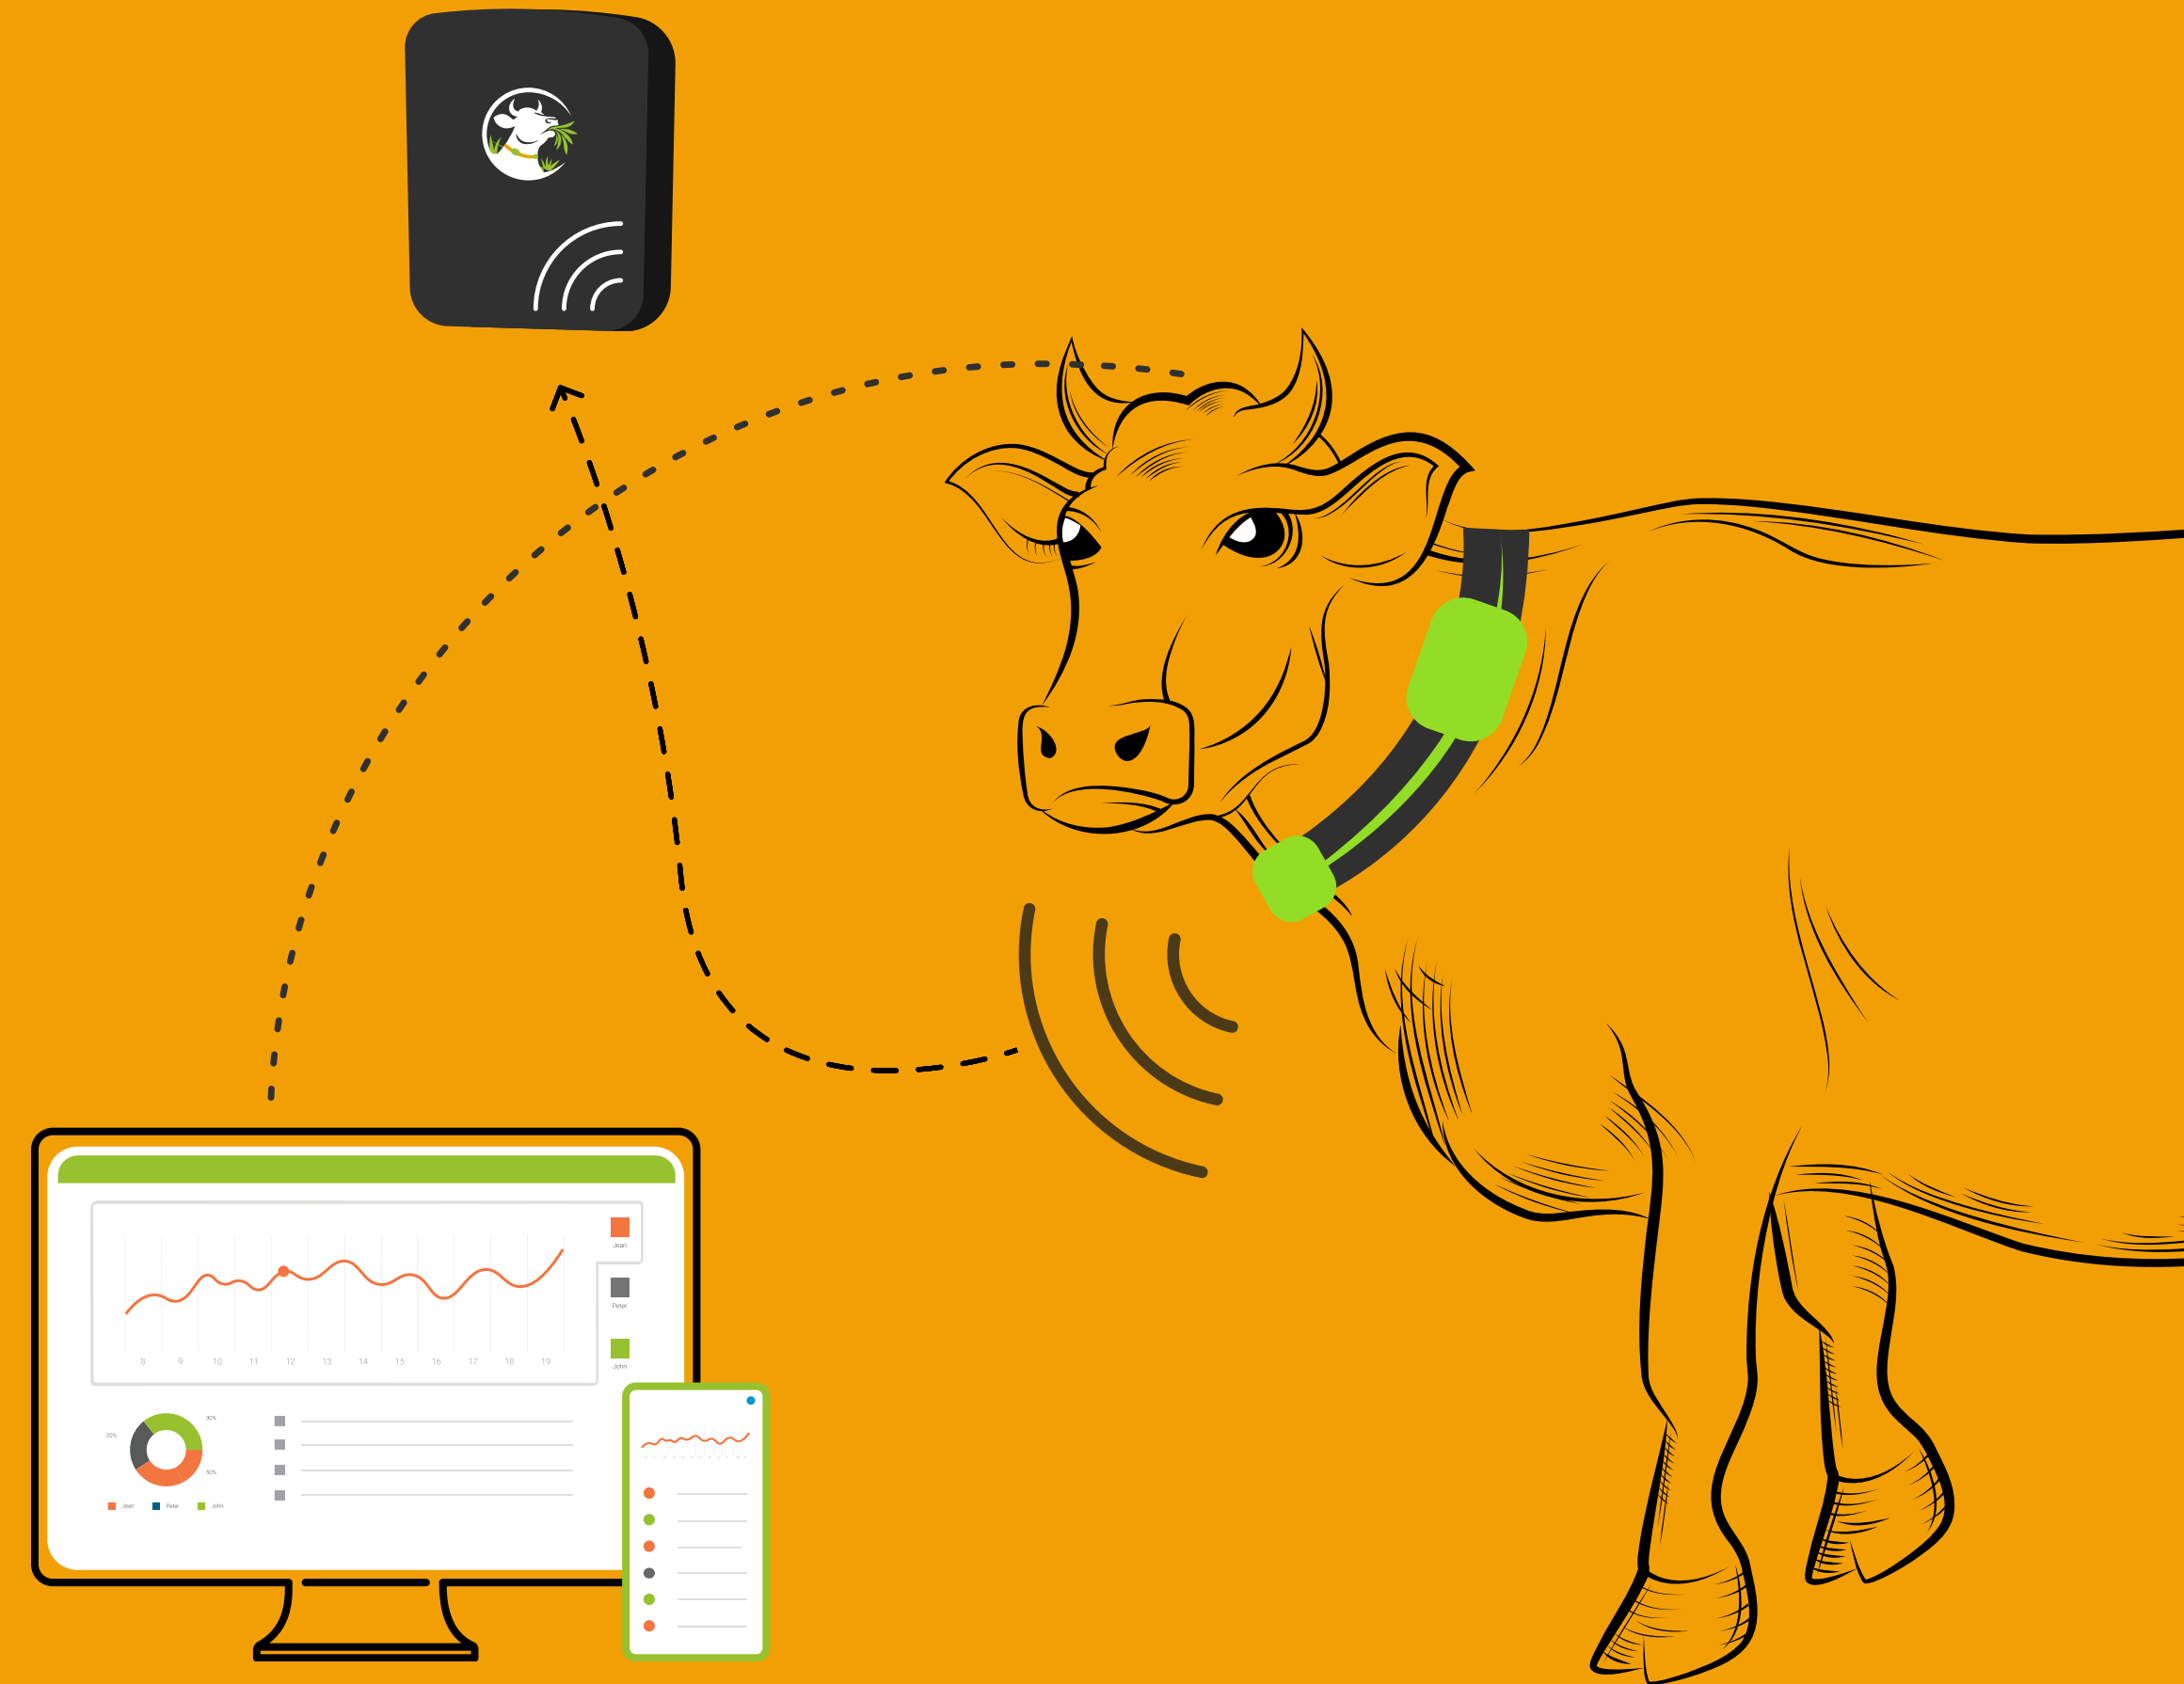

COWHEALTH

How it works:

Cowhealth uses a 3D accelerometer to track feeding behaviors.

- Data is sent to a reader
- The reader transmits all data to Cowhealth Farm software
- The dairy farmer receives organized, accurate information on cows that need attention

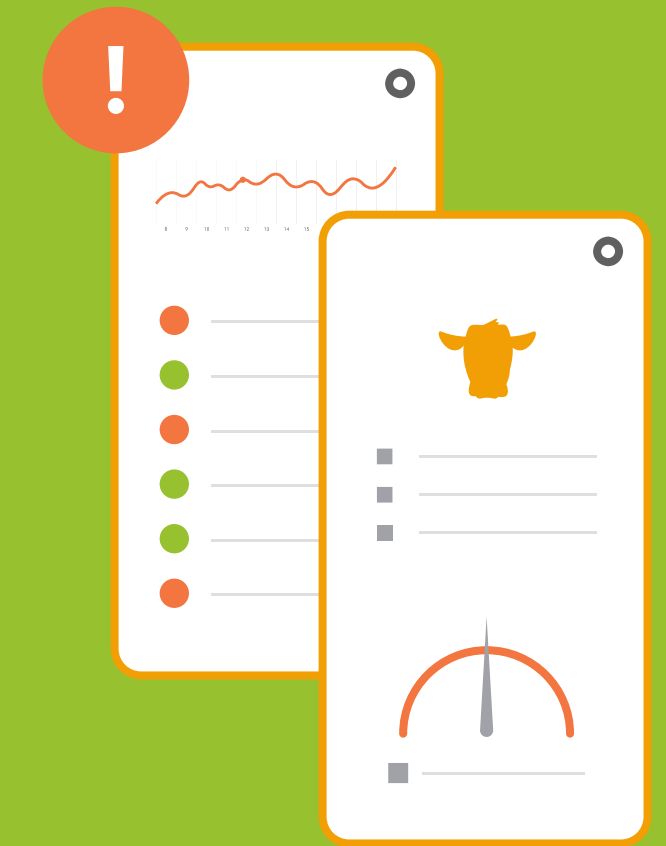

COWHEALTH

What's **Included:**

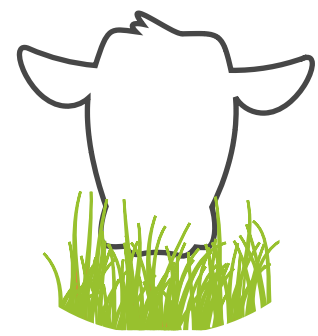

- Cowhealth system: designed for easy, efficient herd management
- Cowhealth Farm: comprehensive software for analyzing data and providing real-time event reports
- Cowhealth Go Pro: a mobile app for farmer convenience
- A reader built for outdoor use to collect data from collars
- Cowhealth sensors for every cow in the herd

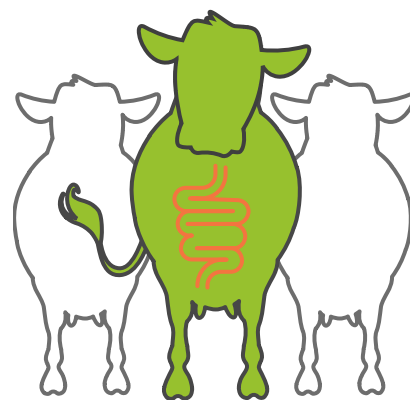

COWHEALTH

What does **it** monitor?

Food intake

Group digestion

Health

Milk volume

Day efficiency analysis

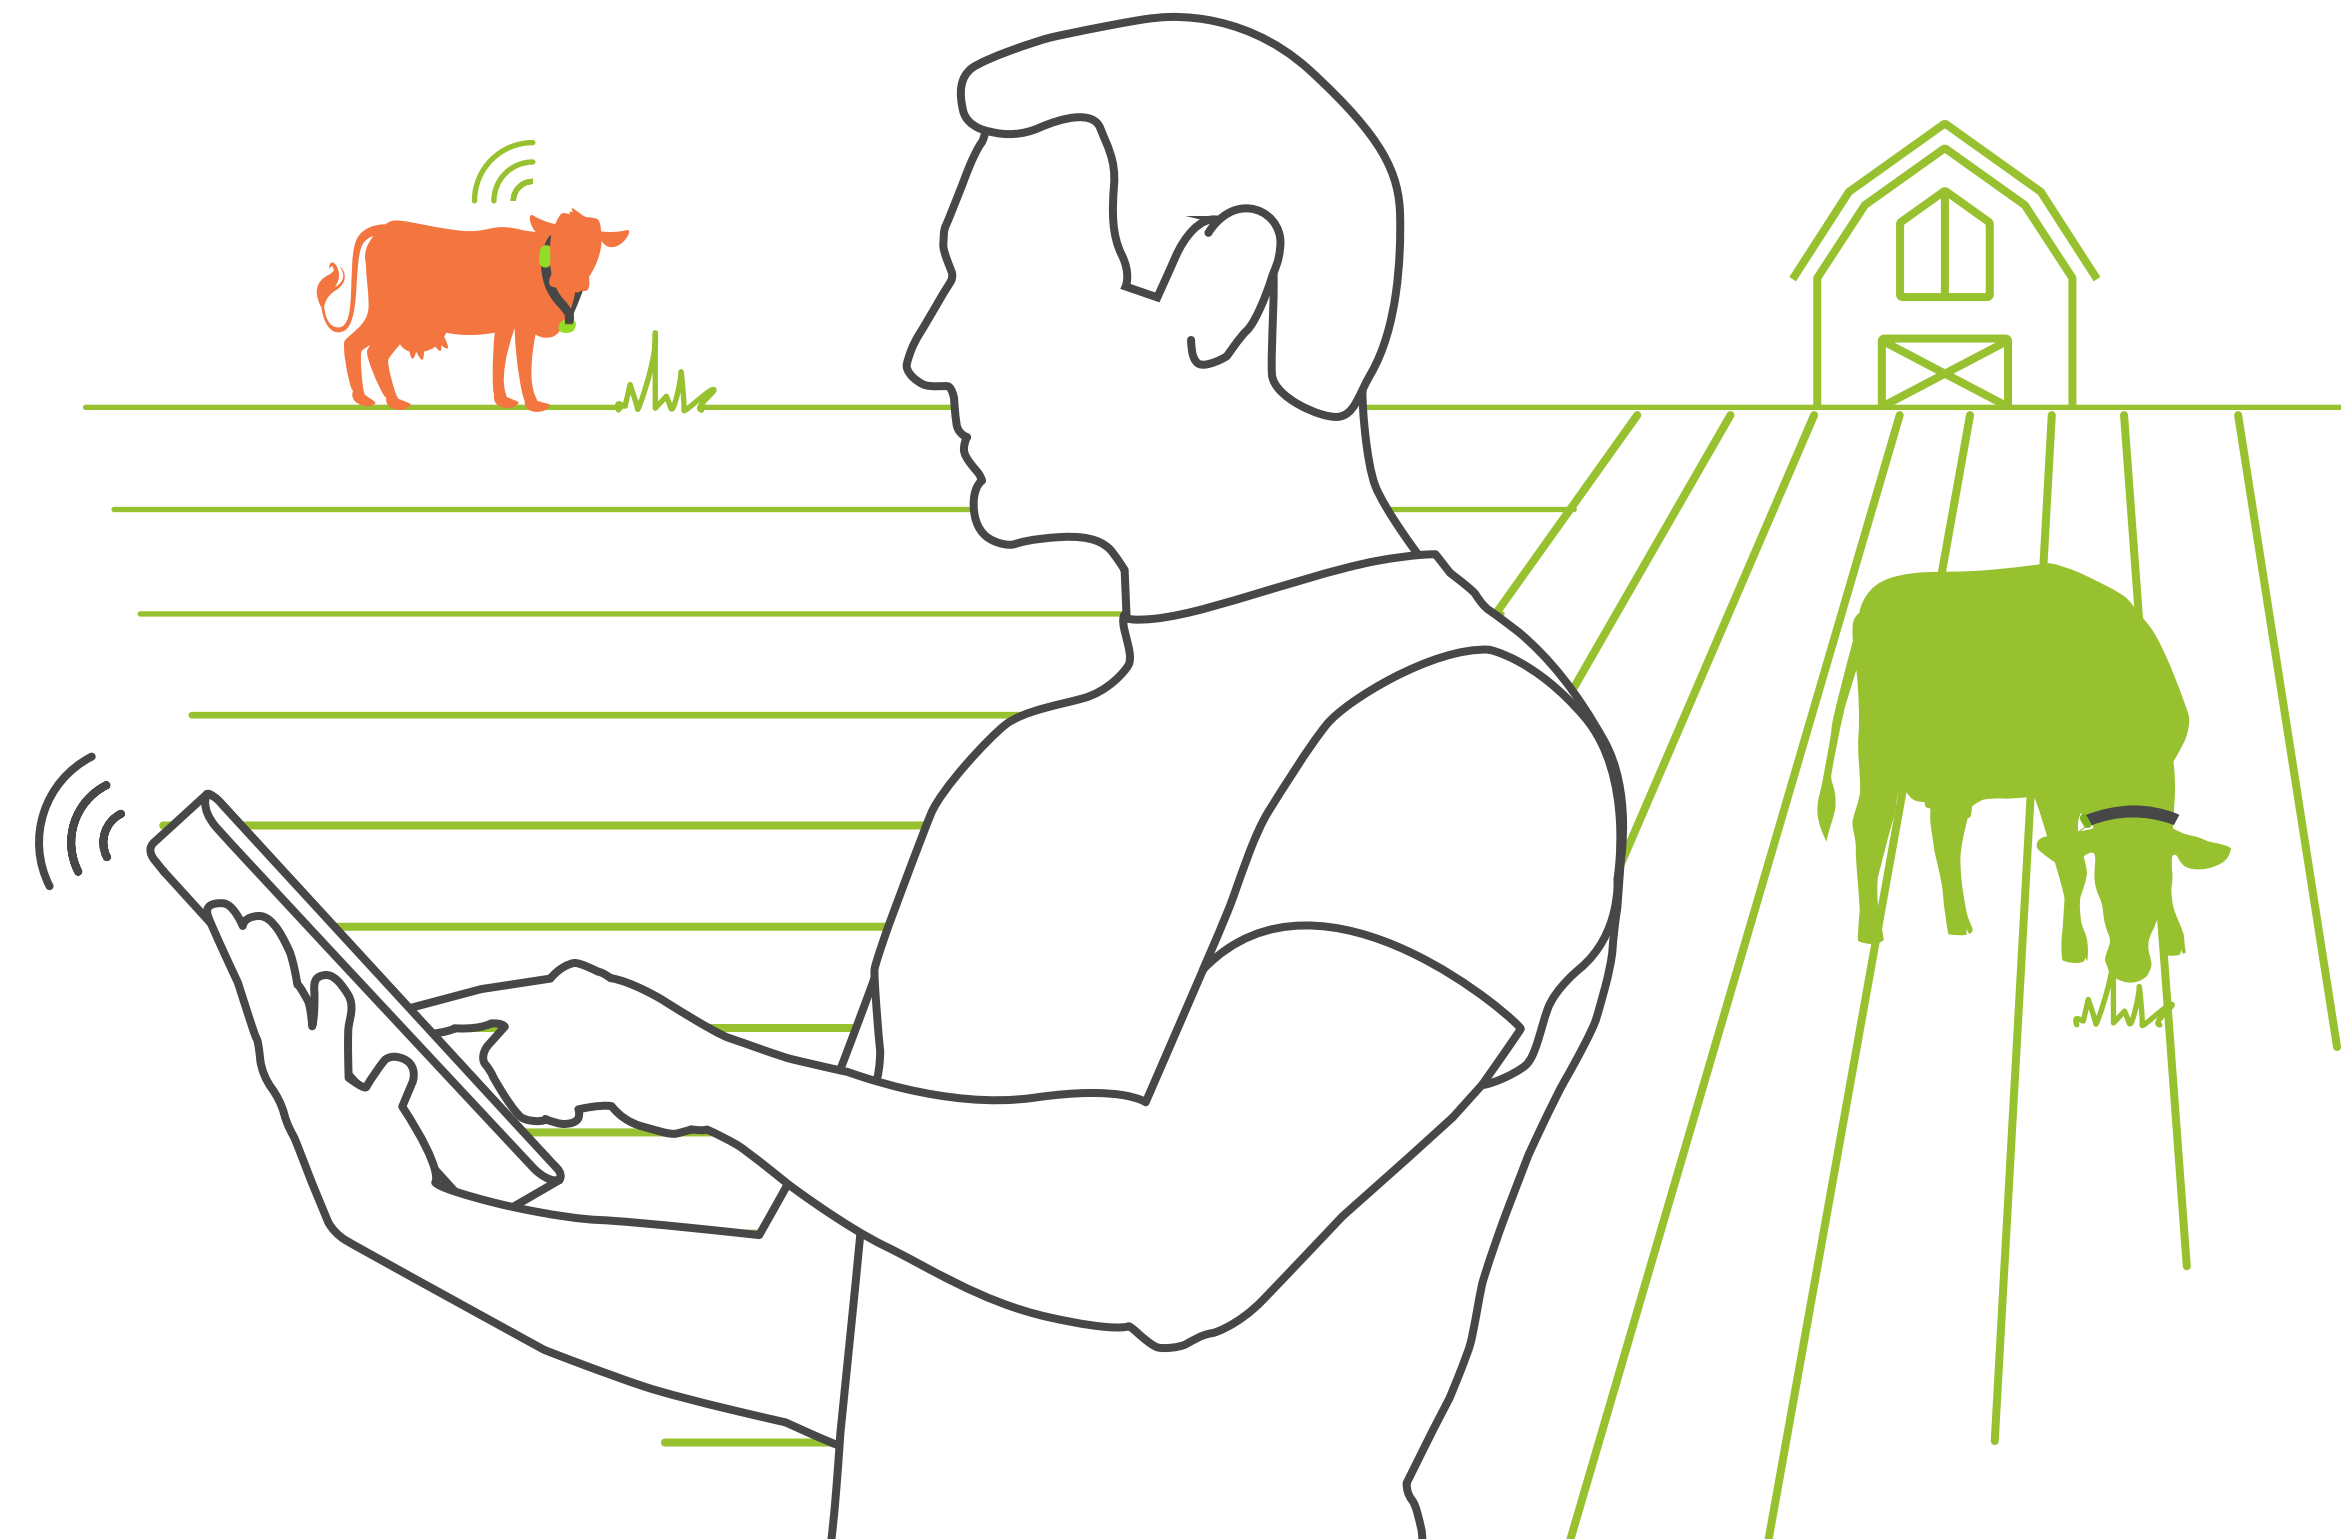

Heat detection

COWHEALTH

Where can **it** be used?

- ✓ In the field or office
- ✓ On mobile apps or desktops
- ✓ Anywhere in the world

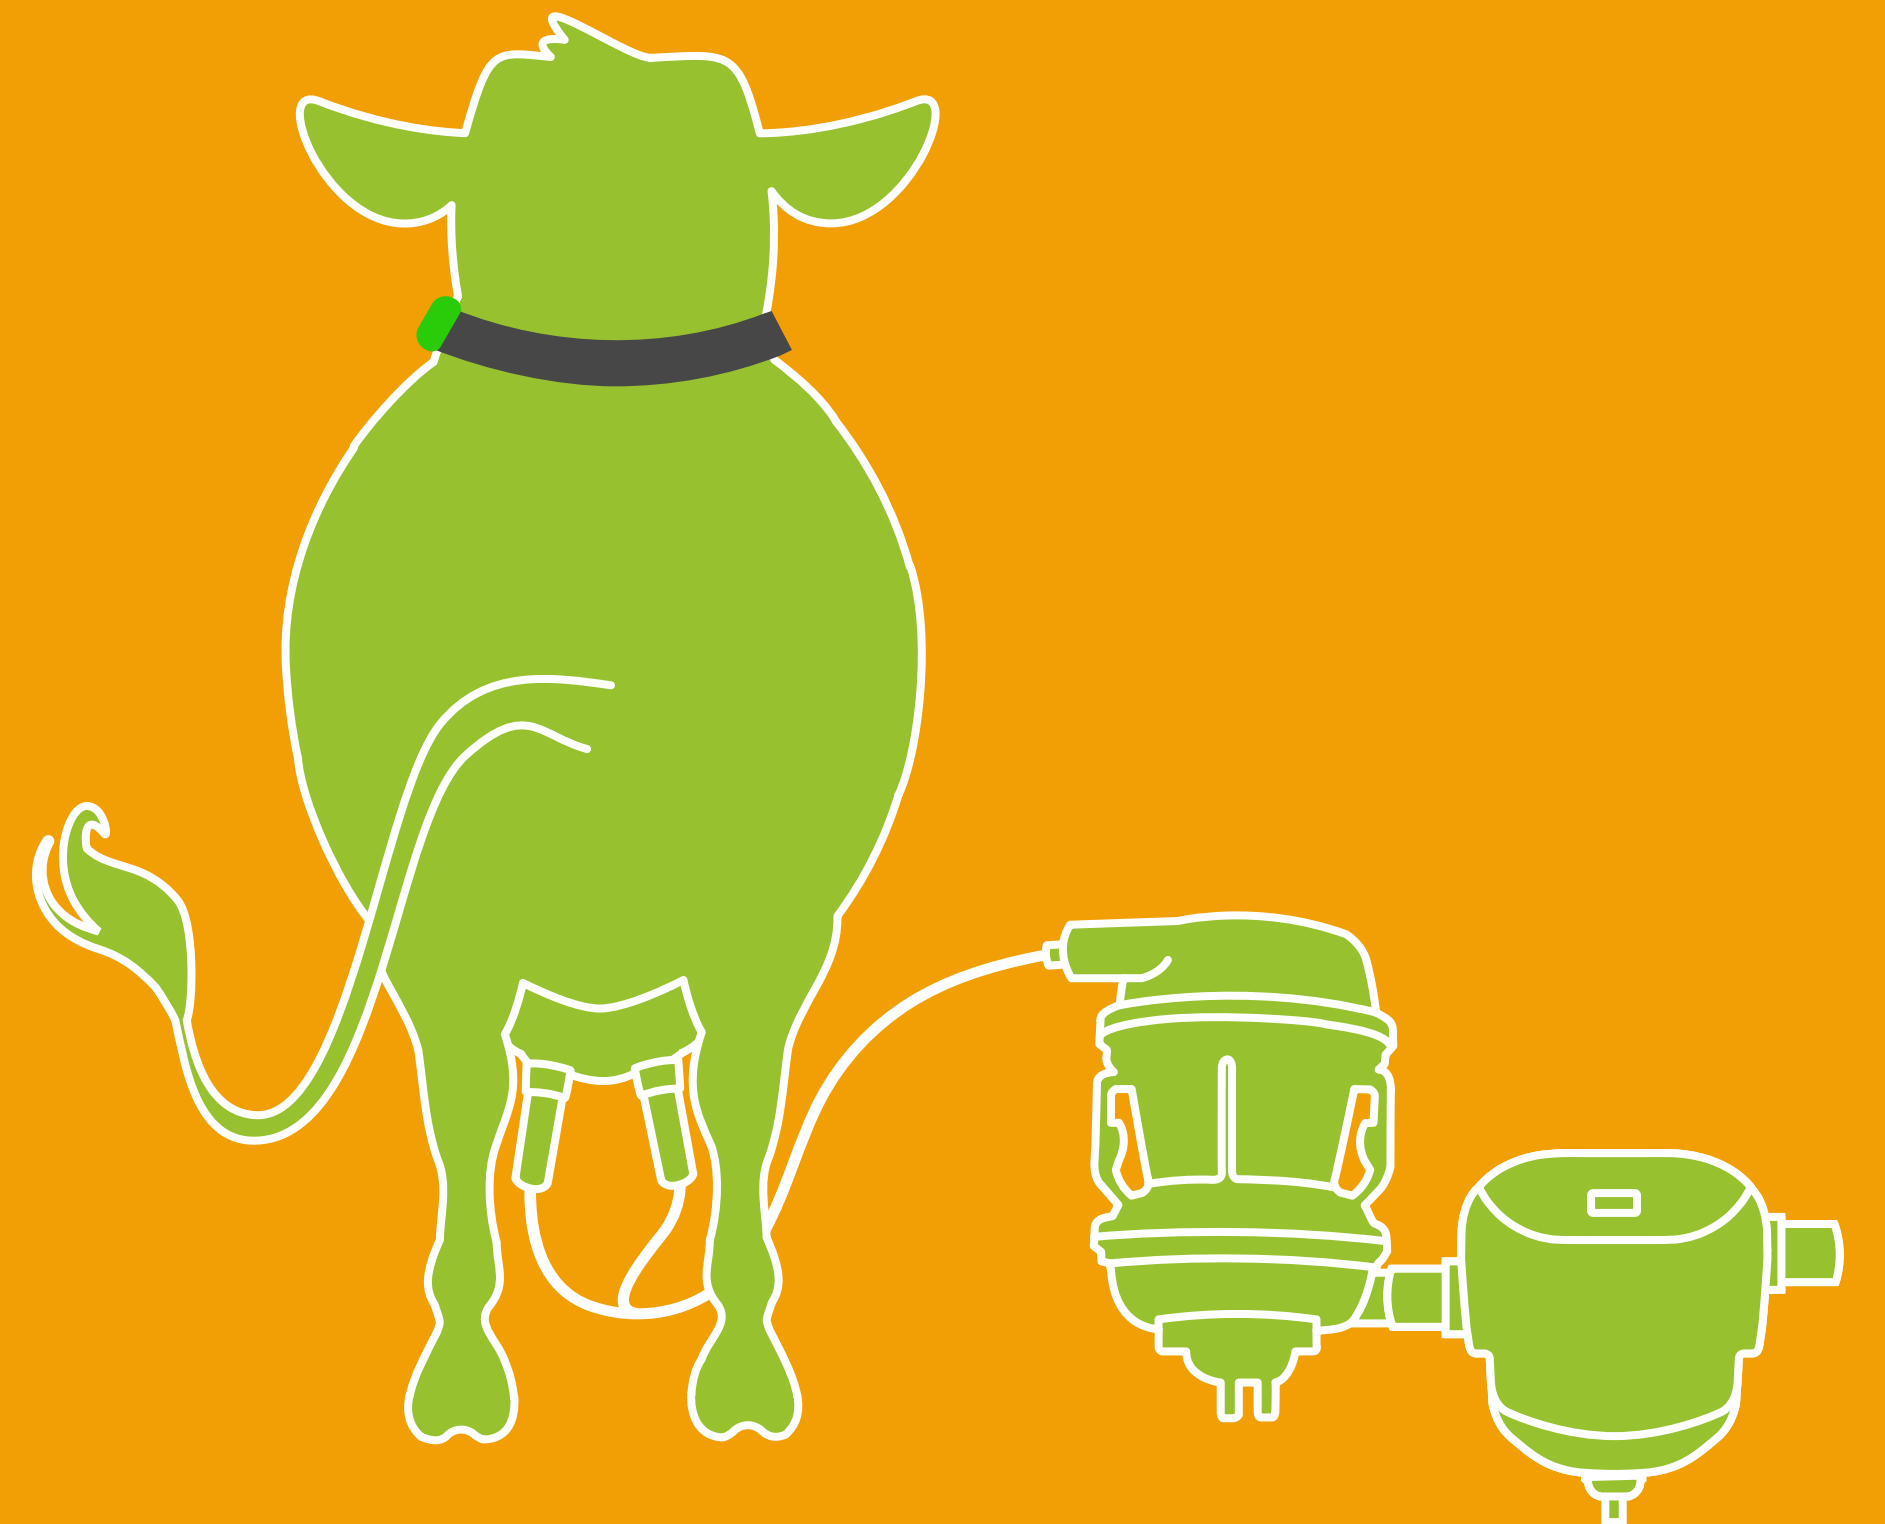

COWHEALTH

Did you **know**?

Cowhealth can be extended to fully integrate with Cowhealth milking parlor solutions for effective milk production management and performance analysis, featuring ICAR-approved milk meters and in-line milk analyzers.

COWHEALTH

How is the **data presented**?

Cowhealth ABC dashboard: reports, graphs, events, tasks, animal updates, etc.

COWHEALTH

Glad you **made it here**

Cowhealth makes your life easier. Your herd needs it.
You deserve it.
